

Having fully described my device, I claim:

Claim 1: A deer-carrier rack for attachment to the carrier frame of an ATV, comprising:

a) a deer-carrier rack attaching frame that is secured to the carrier of an ATV;

b) a lower, hinged deer support frame, rotatably attached to said deer-carrier attaching frame for supporting a deer, wherein said support frame comprises left and right dog leg rods and left and right wing pieces attached to said dogleg rods, respectfully.

Claim 2: A deer carrier rack for attachment to the carrier frame of an ATV as in Claim 1, further comprising a ground brace attached to the outer end of said dogleg rods.

Claim 3: A deer-stand rack for attachment to the carrier frame of an ATV, comprising:

a) a deer-stand rack attaching frame that is secured to the carrier of an ATV;

b) rearwardly facing deer-stand holder rails attached to said deer-stand rack attaching frame;

c) forwardly facing L-shaped rack holders attached to said deer-stand rack;

d) adjustable attaching bars attached to said deer-stand rack adjusting frame wherein said attaching bars may be adjusted to secure said deer-stand rack to different types of ATV carrier frames.
